LEAD GREEN SQUAD an SDG Club

Sustainability is reshaping industries and capital flows, with ESG assets projected to exceed \$30 trillion globally and demand for green skills creating significant employment and entrepreneurship opportunities worldwide.

Anchoring the Sustainable Development Goals in academics, green skills, student profile-building, and institutional excellence—one fortnight at a time.

**NAAC & NEP 2020 Aligned
17 SDGs, 8-month cycle**

LEAD GREEN SQUAD, an SDG club in support of industries

Anchoring the Sustainable Development Goals in academics, green skills, student profile-building, and institutional excellence: one fortnight at a time.

The club offers a structured platform for students that runs on a light, sustainable cadence of one 1.5-hour session every 15 days, combined with periodic community outreach. It is designed to work quietly alongside the regular academic calendar rather than compete with it.

Index and Action

Sustainability Projects
Workshops
Group Discussions
Outreach Programs
Certification

CORE OBJECTIVES

Conduct 14 structured SDG-aligned sessions per 8-month cycle; deliver at least 2 community outreach programs per cycle with a sustainability laboratory, NGOs, or civic bodies; certify students or the institute in green auditing, waste management, renewable-energy basics, and upcycling; operate through a nominal annual membership fee; and maintain a measurable, documented impact archive usable across NAAC criteria.

- 1.5 hr every 15 days, alongside the academic calendar.
- 8 months per cycle, with baseline, midline and endline impact reports.

- 2 visits to off-campus outreach to live sustainability projects
- 5 student-led teams with rotating leadership

What the institute gains:

- Financially independent model
- Continuous, documented evidence for NAAC extension, student support and institutional values criteria
- Ready annual data for NIRF and other rankings
- Campus audit data, waste reduction and a visible community presence

What students gain:

- Certified skills in green skills and green auditing
- Practical application and adoption of industrial requirements through hands-on sessions
- “Outreach Champion” distinction and an industry-signed participation letter
- Pod leadership and career panels with industry professionals
